

*Amendments*

In accordance with 37 CFR §1.121, please amend the above-identified application as set forth below.

**Amendment to the Specification:**

**On Page 6, line 25, please make the following changes**

**A. Examples**

The following gel plates having separating agents applied to both sides were produced according to the processes described above using the isocyanate and polyol raw materials described in European patent EP 57 838 which corresponds to U.S. Patent No. 4,456,642 (Burgdorfer) and EP 511 570 which corresponds to U.S. Patent No. 5,362,834.

---

The term "polyurethane gel" is used in connection with this invention in the sense of an "elastic gel" as described in detail in the aforementioned references. The elastic polyurethane gel utilized with the invention as a basic material is composed of a covalently cross linked polyurethane matrix and a polyol which is firmly bonded therein as dispersant (U.S. 4,456,642, column 3, lines 18-21).
